Comment détecter les effets indésirables médicamenteux ?

Nombreux médicaments pour traiter différentes maladies

MAIS il existe des **effets indésirables**

Comment détecter les effets indésirables médicamenteux ?

Source : articles scientifiques (fiables + précis)

We report two cases of pseudoporphyria caused by naproxen and oxaprozin. We review the current English language literature on this entity and discuss its clinical features, histology, ultrastructure, etiology, and pathophysiology. A 44-year-old man taking naproxen for chronic low back pain and a 20-year-old woman on oxaprozin for rheumatoid arthritis presented with tense bullae and cutaneous fragility on the face and the back of the hands. In both, skin biopsy showed a cell-poor subepidermal vesicle with festooning of the dermal papillae. Direct immunofluorescence revealed staining at the dermal-epidermal junction and around blood vessels with IgG in the first case and with IgG, IgA, and fibrin in the second case. Urine collections and serum samples yielded normal levels of uro- and coproporphyrins.

Objectif 1 : Identifier les phrases qui contiennent des effets indésirables dans un document

Exemple d'effet indésirable

We report two cases of **pseudoporphyria** caused by **naproxen** and **oxaprozin**.

Objectif 2 : Identifier la position des effets indésirables et médicaments

1 - Identifier les phrases qui contiennent des effets indésirables

phrases positives = phrases qui décrivent des effets indésirables

Exemples négatifs (n = 16.695)

4400590 NEG Clozapine intoxication occurring in the treatment of acrodermatitis enteropathica with reference to SMON outside of...
4600337 NEG "Reticular acid syndrome" was prevented with short-time treatment of high dose (4 x 1.5 g/m²) cytarabine.
4002502 NEG BACKGROUND: External beam radiation therapy often is avoided in the treatment of rhabdomyosarcoma (RMS) in young child...
8700794 NEG Although the enuresis ceased, she developed throbbing headaches, nausea, vomiting, paresthesia, lethargy, fatigue, and...
17602448 NEG A 44-year-old woman had uneventful bilateral laser-assisted subepithelial keratectomy (LASEK) to correct myopia.
8902058 NEG A 16-year-old girl with erosive, polyarticular JRA showed no detectable change in her articular disease following nine...
16426149 NEG Resection and use of a cycloxygenase-2 inhibitor for treatment of pancreatic adenocarcinoma in a cocktail.
16844795 NEG Differences in interpretation by patients and healthcare professionals may cause the observed disparities in serious...
17902124 NEG We present a case report of a cytomegalovirus (CMV)-seronegative, 58-year-old male who received a CMV-seropositive d...
10099659 NEG Dihydropyrimidine dehydrogenase (DPD) is the rate-limiting enzyme in the catabolism of 5-FU.
9307456 NEG The descendant was also prescribed tramadol, gabapentin, modafinil, carisoprodol, and Xyrem.
12806509 NEG Magnetic resonance imaging of the spinal cord disclosed signal-intensity abnormalities from C4 to C3.
85152828 NEG In this case report we describe the occurrence of oral lichen planus-like lesions as the first manifestation of chro...
8431714 NEG The day after the infusion, she no longer complained of diplopia, and her ophthalmoplegia had improved dramatically.

Conclusion

- Classifieur très précis (98.12% - précision, 99.8% rappel)
- Haute précision pour la détection des effets indésirables (92-93%)
- Perspectives
 - Ajouter une/des couches d'Attention
 - Utiliser des word embeddings pré-entraînés
 - Bénéficier du transfert learning avec des approches de type Transformer, par exemple Bio-BERT
 - Mettre les résultats à disposition sous la forme d'une application Flask
 - Publier les résultats dans une revue d'informatique médicale
